**Time Zone:** US/Pacific Time (GMT-08:00)

**Event Type:** Conferences

**Event Topics:** agentic, ai, future, iam, quantum, technology

Bernstein's 4th Annual TMT Forum convenes senior technology executives, investors, and industry experts for two days of in-depth discussion on the forces shaping the next phase of the technology sector. Held in Silicon Valley, the forum brings together public- and private-sector leaders across software, semiconductors, digital infrastructure, fintech, mobility, and emerging platforms to examine strategic, operational, and market developments shaping global technology investment and adoption.

The agenda features thematic panels and expert-led discussions addressing critical topics, including AI sustainability and risk, agentic commerce, quantum computing, digital assets, data center financing, and the future of platform-driven industries.

acceligence will participate in the Securing AI expert discussion, focused on identity, security, and agent risk in an AI-enabled world. As organizations accelerate the deployment of advanced AI systems, the forum provides a timely setting to explore the governance, security, and operational considerations required to deploy these technologies responsibly and at scale.
