**Tags:** assessment, cybersecurity, offensive security, tabletop, validation

---

This collaboration brings together acceligence’s expertise in digital strategy, transformation, and organizational design with Bishop Fox’s unmatched depth in offensive security testing and continuous threat exposure management. The result is a powerful alliance built to help organizations protect what matters most—while enabling them to innovate with confidence.

“As technology accelerates, the gap between innovation and security can’t afford to widen,” said Justin Greis, CEO of acceligence. “Our partnership with Bishop Fox gives leaders a way to close that gap – combining strategic foresight with world-class technical expertise to strengthen resilience from the inside out.”

## A New Standard for Proactive Cyber Defense

For more than 20 years, Bishop Fox has been trusted by Fortune 100 companies and fast-growing innovators to test, challenge, and fortify their defenses against real-world adversaries. Their work spans red teaming, AI/LLM testing, and continuous threat exposure management across cloud, network, and application environments.

acceligence brings a complementary lens – one focused on strategy, leadership, and digital transformation. Together, the two firms deliver a multidimensional approach to cybersecurity that integrates technology, human behavior, and organizational alignment.

## Integrated Cyber Assessment & Strategy

A holistic evaluation bridging technical and strategic dimensions of cybersecurity. Organizations gain a 360-degree view of strengths, vulnerabilities, and priorities – empowering leaders with the clarity to make informed, forward-looking decisions about risk and resilience.

## Digital Health Checks & Validation

Rapid, high-impact reviews that test the integrity of AI, cloud, and digital ecosystems. By combining Bishop Fox's attacker insight with acceligence's enterprise strategy expertise, teams uncover hidden exposures, validate controls, and strengthen their security posture without slowing down innovation.

## War-Gaming & Tabletop Exercises

Immersive simulations that bring real-world attacks to life. Executives, security teams, and boards gain firsthand experience navigating incidents under pressure – building the confidence, communication, and coordination required to respond effectively when it counts.

“Our collaboration with acceligence represents the best of both worlds,” said Vinnie Liu, CEO of Bishop Fox. “We’re pairing our deep technical expertise with their strategic acumen to help clients not just defend against threats—but build the kind of cyber resilience that fuels long-term growth.”

By uniting strategic vision and offensive expertise, acceligence and Bishop Fox are redefining what it means to be secure in the digital age – turning cybersecurity from a cost center into a competitive advantage.

## About acceligence

acceligence helps organizations accelerate transformation and thrive in the digital era. Through strategy, technology, and leadership excellence, acceligence empowers clients to build the capabilities, culture, and confidence needed to win in the age of AI.

## About Bishop Fox

Bishop Fox is the recognized leader in offensive security, delivering tech-enabled, human-driven solutions across continuous threat exposure management, red teaming, and penetration testing of AI/LLM systems, applications, networks, IoT, and cloud environments. For over two decades, Bishop Fox has helped the world's most trusted brands uncover and address vulnerabilities before they can be exploited.
